EMPLOYMENT

Senior Software Engineer at Subex Ltd   **June 2019 - Present**

- Experienced in Telecom Domain of System Testing, Functional Testing and Regression Testing.
- Very Good Understanding of different Software Development Life Cycles (SDLC) like Waterfall, V and Agile Methodology(SCRUM Framework).
- Very Good Understanding of Software Testing Life Cycle (STLC).
- Continuously involved in analyzing the requirements for Test designing part of different projects.
- Proficient in working at Application Level using various Unix commands.
- Efficiency in Documentation, Reporting and Tracking of the Defect identified.

LANGUAGES AND TECHNOLOGIES

- Programming Languages – C, Java, Python
- Operating System - Windows, CentOS
- Database - MySQL, Oracle, Postgres
- Frameworks and tools - Oracle SQL Developer, DBeaver, Postman
- Others - Git, Selenium, Django

EDUCATION

- B.Tech. in Computer Science and Engineering, July 2015 - May 2019 – DGPA : 7.35
  Netaji Subhash Engineering College, MAKAUT, Kolkata, India
- XII, CBSE, 2015 - 86.20%
  Guru Nanak Higher Secondary School, Ranchi, Jharkhand
- X, ICSE, 2013 - 77.50%
  Sacred Heart School, Adra, West Bengal

MAJOR PROJECT

1. **ROC PS (Revenue Operation Centre - Partner Settlement)**
ROC PS allows operators to focus on efficient management of costs, in maximizing revenue, and achieving profitability. The solution efficiently utilizes network resources to reduce network costs - these include leased circuit costs, access costs and interconnection costs. This helps the service providers to adopt lean operating principles by automating invoice verification processes, dispute resolution, and expediting internal and external audit compliance.
Responsibility:

- Primary Responsibility involved Functional Testing and System Testing of New Requirements and of the most important modules (Match and Rate, Billing, Reconciliation, Rate Sheet, Reports, Route Optimization).
- Deploy builds in both Unix and Windows Environment.
- Test Execution on both PostGres and Oracle Databases.

Projects worked on using ROCPS Implementation (Under Customization and Delivery Process) –

ROCPS Vodafone Ziggo
Extra Customized modules under Client Requirement -
- Datawarehouse Report Generation using the Concept of Audit.
- Coin and Cramer Interface Concept were Implemented for generating ERP Report.
- Used Postman for API testing.

ROCPS DTAC
- Customized Parsers were introduced for different type of EDR format for Performing Match and Rate and Reporting Purpose.

ROCPS RO Omantel
Extra modules under Client Requirement -
- Route Optimization (BCR and Sales).
- Agreement using Rate and Difference.
- Different Birt Reports.

2. **Automation Framework (Based on ROC PS).**
Had Hands-On Experience of Automation Framework using TestNG and Java with Selenium.
Responsibility:
- Preparing Excel Data and CDRs for the Automation run.
- Extracting proper Element Locator from the application.

ACHIEVEMENTS AND RESPONSIBILITIES

- Got Make It Happen Award in Subex, for extraordinary performance.
- Got A Team Award in Subex, for outstanding performance.
- Was Selected for Brain - O - Mania (State Level Quiz).
